

## Assignment 1: Part 1

**Description** - For this I have chosen the OLX app from the playstore. It is a platform to Buy and Sell the second hand things. The screen which I will clone is as follows.

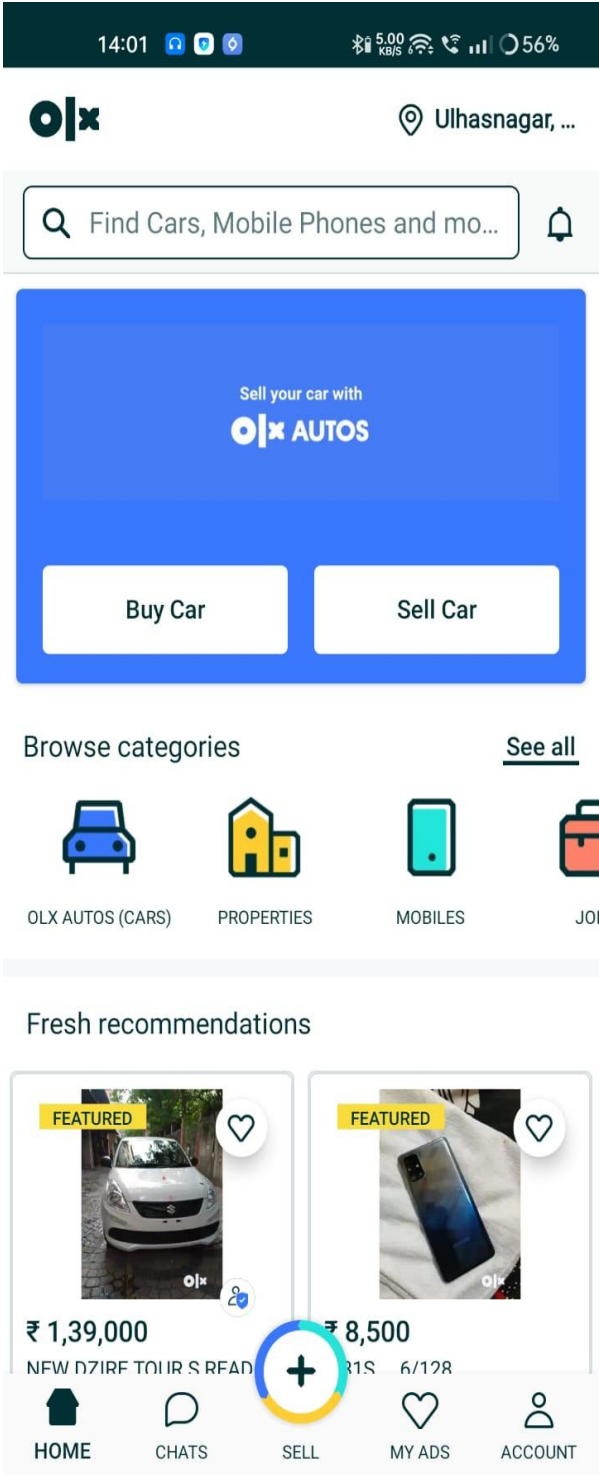

### 1. Splash Screen

Screenshot	Features
	When users click on the application to open it, they will see a simple splash/first screen. The screen has a simple logo image in the center and a tagline at the bottom.

## 2. Login Page

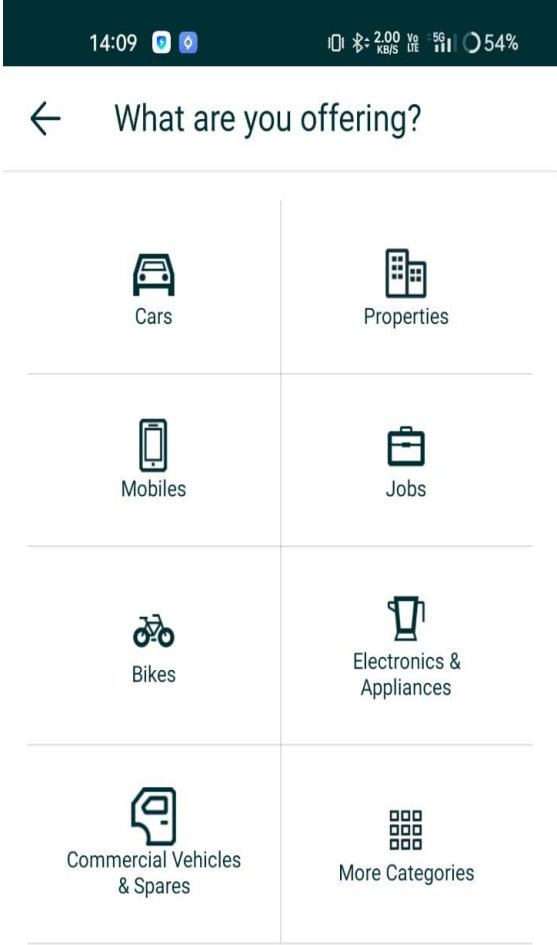

Screenshot	Features
	<p>It is the login page, from which the user can access previous accounts or create new ones. We will use an OTP-based system to login via phone number; alternatively, we can use Google account authentication. At last, the user can also log in by entering his or her own email address.</p>

### 3. Home Screen

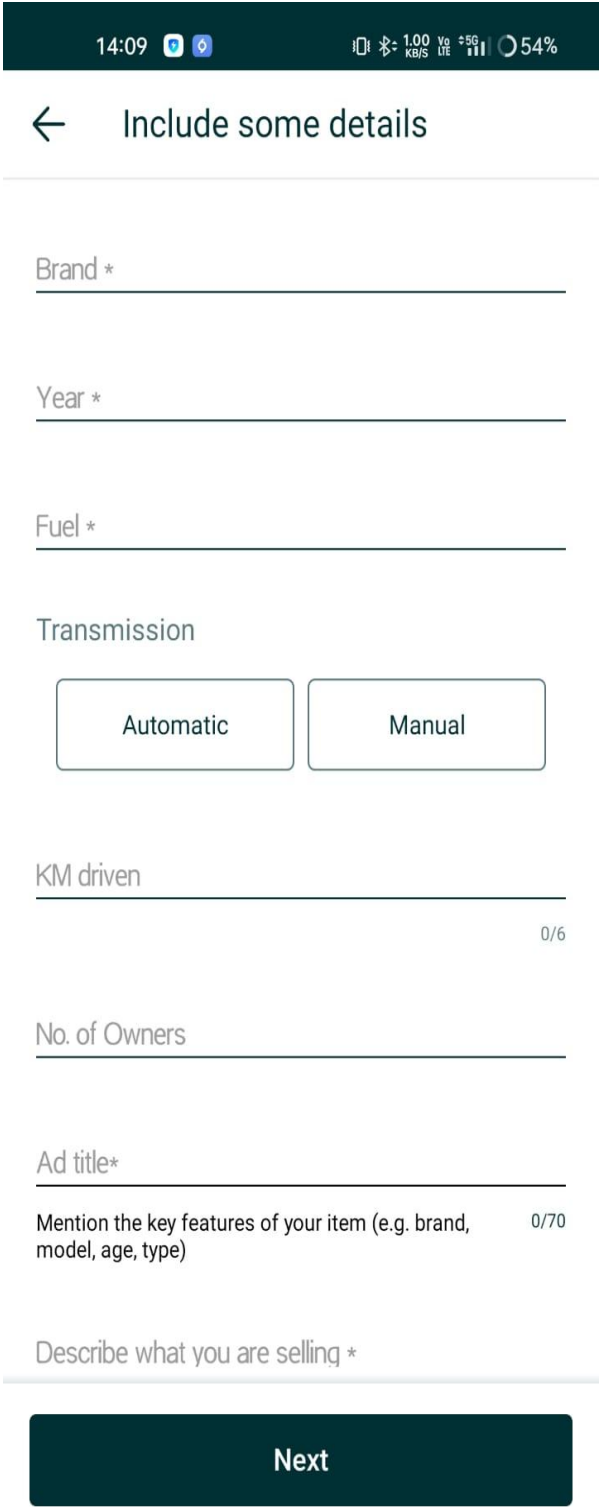

Screenshot	Features
	<p>It will be our application's home screen, which will include various widgets and icons, as well as the ability for the user to switch between different pages such as chats, account information, sell, and so on. The home screen is divided into rows and columns where the user can browse through various categories or view product images. There will also be an app bar where the user can search for a product by name.</p>

## 4. Sell Screen

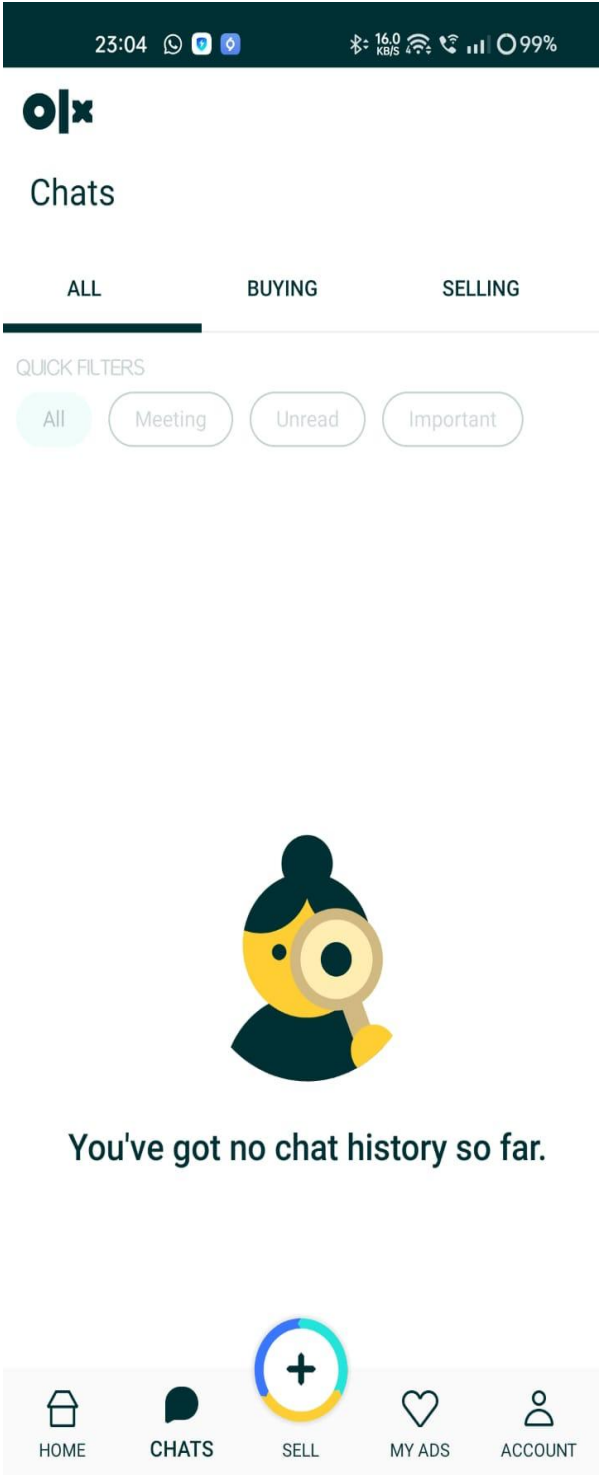

### Part 1

Screenshot	Features
 <p>The screenshot shows a mobile application interface for selling items. At the top, there is a status bar with the time 14:09, signal strength, and battery level at 54%. Below the status bar is a header with a back arrow and the text 'What are you offering?'. The main content area is a grid of eight categories, each with an icon and a label: Cars (car icon), Properties (building icon), Mobiles (phone icon), Jobs (briefcase icon), Bikes (bicycle icon), Electronics &amp; Appliances (blender icon), Commercial Vehicles &amp; Spares (truck icon), and More Categories (grid icon).</p>	<p>If a user wishes to sell something on the site, this is the first section of the form. It has several icons for various categories. The page is organized into rows and columns so the user may choose the product category they wish to sell.</p>

**Part 2**

Screenshot	Features
 <p>The screenshot shows a mobile application interface for adding a new listing. At the top, there's a status bar with the time 14:09, signal strength, and 54% battery. Below the status bar is a navigation bar with a back arrow and the text 'Include some details'. The form consists of several input fields: 'Brand *', 'Year *', 'Fuel *', 'Transmission' (with two buttons: 'Automatic' and 'Manual'), 'KM driven' (with a '0/6' character count), 'No. of Owners', 'Ad title*' (with a '0/70' character count), and a text area for 'Describe what you are selling *'. At the bottom, there is a large green button labeled 'Next'.</p>	<p>It is a continuation of the previous step in which the user must fill out all of the details about the product category they have chosen to sell, different product categories have different forms or details to fill out.</p> <p>For example, We have considered the product category of the car, so all of the details such as brand, fuel type, transmission, and so on must be filled out.</p>

## 5. Chats Screen

Screenshot	Features
	<p>It is the page where users can chat with the buyer or the seller regarding the product if they have any doubts.</p>
